Crayola Color Explosion Glow Dome Brings Creative Wonder to Kids' Self-Expression

Easton, Pa. - To give the gift of wonder this holiday season, moms need to look no further than the **Crayola Color Explosion Glow Dome**. Wide-eyed wonder is sure to appear on kids' faces when the lights go out and they watch their artwork glow and spin on a moving, two-layered dome of light. They can control the fun by using the controls to light either the moving dome or stationary surface inside, or flash between the two. They can also dial up the "glow-motion" to warp speed or make their colorful world take a leisurely spin with fast, medium and slow speed settings. The plastic dome wipes off easily, giving kids unlimited miles to travel to new worlds they create with their imaginations!

Product

\$29.99	6+	Now

The **Color Explosion Glow Dome** lets kids bring their imaginations to life and set them spinning in colorful "glow-motion." Start by creating your main drawing on the center *Glow Panel* and the rest of the scene on the *Glow Dome* itself. Choose a cool space scene with planets revolving around the sun, or trace a dangerous undersea mission surrounded by hungry sharks—the two starter scenes included. Or, let your imagination take you wherever it may and design an original, one-of-a-kind scene!

Then hit the lights, set your *Glow Dome* spinning and **WOW!** Wild, animated scenes come to life. Wipe the surfaces clean, and let the fun begin again!

The *Glow Dome* includes 6 neon *Glow* markers, 2 starter scenes, a *Light Action* button, a *Spin Action* button, a *Glow Panel* and a *Glow Dome*. Additional designs can be downloaded at www.crayola.com/glowdome. 3 AA batteries are not included.
