

Nature Sings

Learning through the Arts

RESPOND to the many ways sounds can be visualized by thinking of those made by the ocean, trees swaying in the wind, raindrops, rivers, singing birds, and buzzing bees.

LIST SOME NATURE SOUNDS THAT BEST MATCH THE LINES.

.....

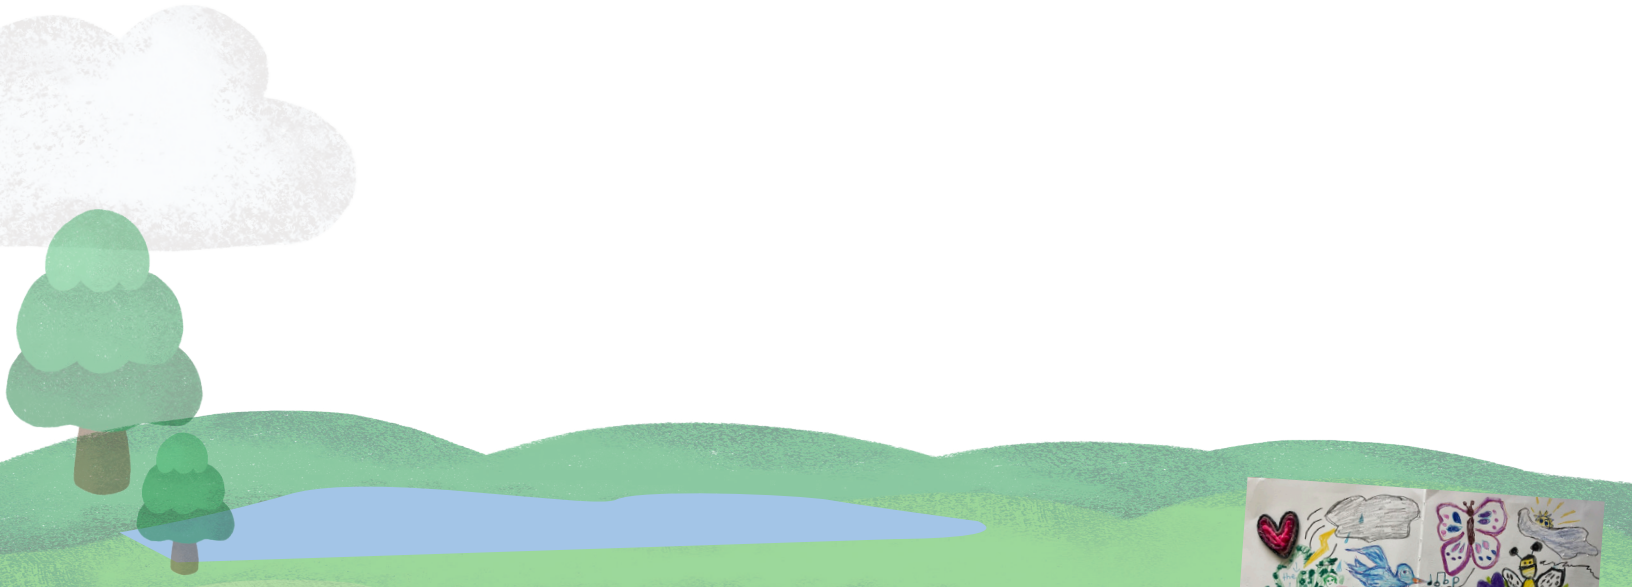

~~~~~

|||||

CREATE a soundscape scene by sketching images of animals and objects in nature that make sounds.

CONNECT the sounds from nature to the movements you observe and can make. Improvise a nature dance that demonstrates the sounds you heard.

Playfully explore motions that represent the flow of wind and rain and the sounds of creatures you hear when you listen to nature's songs.

PRESENT your soundscape and nature dance as you explain what natural sounds you heard outdoors.
