TIPS AND TRICKS

Scribble

Scrub

Scribble again!

Color Change Tips:

- Color your pets with marker first. Then, if your pet is white, place it into the freezer to turn it blue. If your pet is blue, place it in **WARM** water to turn it white.
- If you put your pet into cold or warm water, your marker designs will blur and wash away.
- As your pet warms or cools, you may notice some speckles on their fur. Place in cold water to turn blue again. Place in warm water to turn white again.
- Make sure your pet is clean and **completely dry** before coloring again.

For Best Results:

- Work on a clean, flat protected surface.
- Keep cloth or paper towels handy—water play may get messy.
- Use only Scribble Scrubbie Washable Markers on Scribble Scrubbie Pets.
- To ensure a clean pet, rinse the Scrub Tub after each use and refill with clean, cool water.

Clean Up:

- For best results, submerge pets in a sink and scrub.
- Rinse pets, brush and tub. **Dry before storing.**
- Cap markers securely after use
