

# Global Citizenship & Sustainability Goals

## Creativity Connects the World

David H.

**CONNECT** with how others around the world show they care about the people, the planet, and set goals for its protection. What does sustainability mean? What are the United Nations Sustainable Development Goals? What does it mean to “think global” and “act local”?

---

**CREATE** a poster or sign that will communicate your sustainability goals. Perhaps you will focus on some of the United Nations goals, such as *Quality Education*, *Life Below Water*, or *Climate Action*. Use visuals to show your project’s goals. Posters use few words. Vibrant colors and bold designs help emphasize the key points.

SKETCH IDEAS FOR YOUR POSTER OR SIGN HERE

**PRESENT** the poster you designed and listen to how others view the main message. Did they understand your goal and what you plan to do?

**RESPOND** to the feedback from others. Revise the poster to strongly communicate your main ideas. Create other versions of your sign by turning it into a logo or buttons people can wear. Consider ways to get others involved and how they can help move the project forward.
