

# World Friendship

## Creativity Connects the World

**RESPOND** to World Friendship Day by discussing what it means to deepen understanding about people around the globe. What makes friendship with children in other countries an important part of global diplomacy?

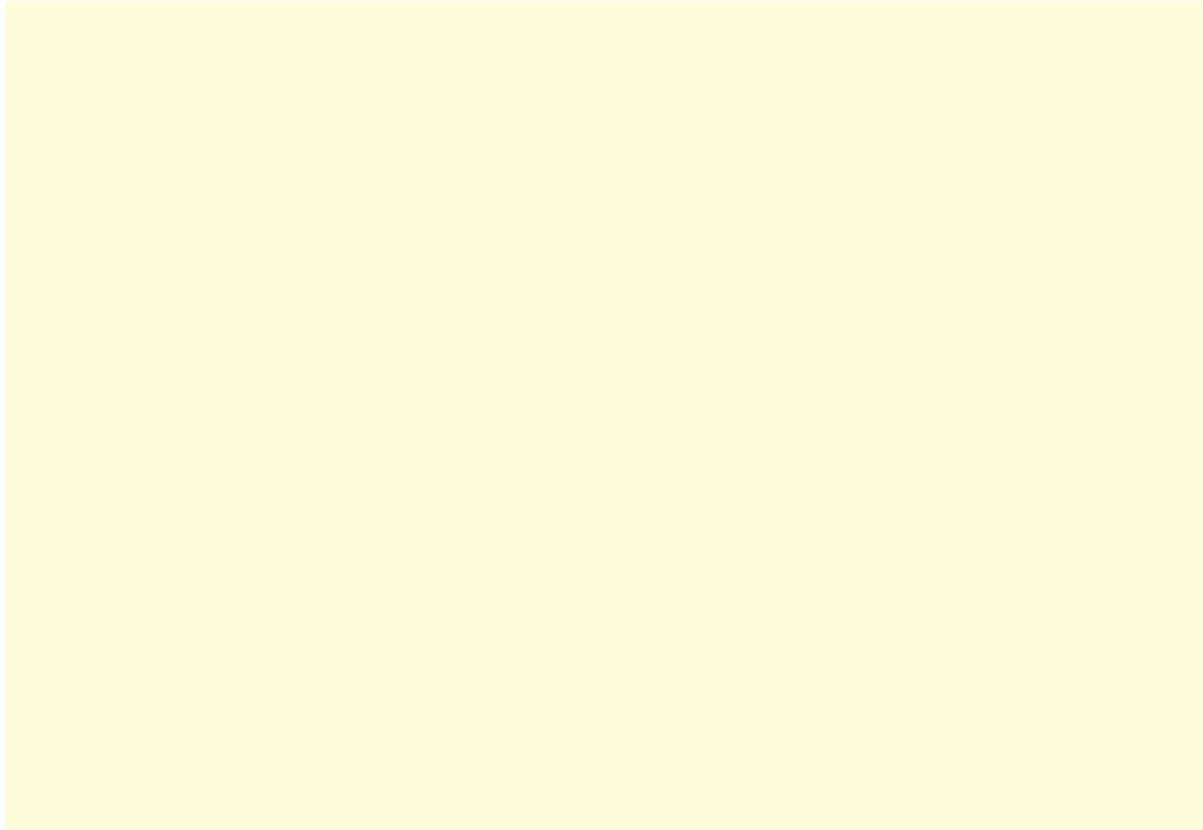

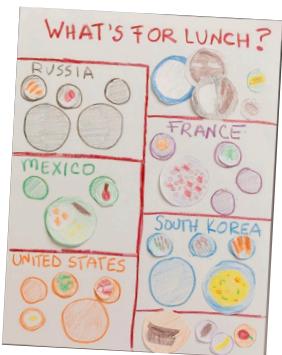

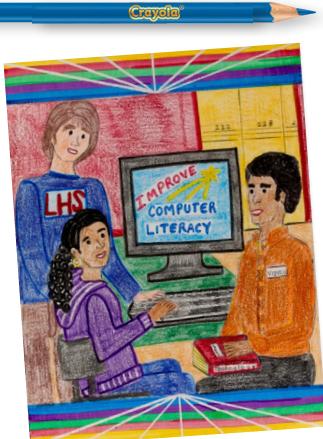

**CONNECT** your ideas about friendship with a map of the world. Select a country to learn more about. Research how children in other countries and cultures live, play, and learn. How does exploring the similarities and differences of growing up in different countries help you feel connected to children in other places?

**CREATE** art with a few classmates that represents what you have learned. Your team might sketch a world map that marks your location and note each of the other countries that classmates researched. Or your team could create a paper friendship chain and add various facts about growing up in other countries. Use the sketching area on this page to show your suggestions.

WRITE OR SKETCH SUGGESTIONS FOR YOUR TEAM PROJECT HERE.

**PRESENT** your sketch to your group. Collaboratively decide what your team's art project will be and what each team member will contribute to the art.
